

OLEABASE™ Plasticized

Occlusive Preparations Maximized

Consisting of a blend of polyethylene and mineral oil, MEDISCA's **OLEABASE™ Plasticized** is a soft and fragrance-free ointment base exhibiting oleaginous and emollient properties. Intended for both dental and topical applications, this anhydrous delivery vehicle is ideal for both lipophilic and water-soluble actives in occlusive preparations. With its hydrocarbon gel composition, **OLEABASE™ Plasticized** also exhibits a unique resilience to extreme temperatures while maintaining its original consistency.
