

VERSAPRO™ ANHYDROUS

180°
Days

VersaPro™ Anhydrous Base is MEDISCA's newest addition to the tried and tested VersaPro family. This new base has been specially developed and manufactured to achieve a water activity below 0.6 to allow for a **default BUD of 180 days, as per current USP <795> guidelines.**

VersaPro Anhydrous Base is scientifically formulated to contain several ingredients to **promote drug delivery of both lipophilic and hydrophilic APIs** providing compounders the versatility they need. It also contains a combination of silicone and natural oils to provide the ideal patient sensory experience, with a soft, moisturized feel.

FEATURES

- Contains skin delivery enhancer and film forming agents
- Water Activity less than 0.6
- Proven Hypoallergenic through HRIPT (*Human Repeat Insult Patch Test*)
- Contains a combination of silicone and natural oils
- Free of preservatives, soy and petrolatum

BENEFITS

- Promotes absorption of compounded preparations
- Dermatologist-tested
- Improve pharmacy workflow and operations with longer default BUDs
- Superior non-greasy sensory properties for a better patient experience
- Excellent versatility making compounding easy
- Low water activity promotes chemical and microbiological stability

NICHE MARKETS

- Pain Management
- Women's Health
- Men's Health
- Hospice (*Chronic pain, nausea*)
- Autism (*Behavioural disturbances*)
- Dermatology (*Anesthetics*)
- Veterinary

BASE SPECIFICATIONS

Appearance	Off-white to pale amber translucent gel with characteristic odor
Function	Anhydrous base for pharmaceutical compounding
Intended Use	– Versatile, topical drug delivery vehicle – Can be used in human and veterinary patients
API Compatibility	For lipophilic and hydrophilic drugs such as hormones, analgesics, etc...
Tolerance to API Base & Salt Forms	Strong
Application to Mucous Membranes	No
Heat Sensitivity	Stable at room temperature and 40 °C (104 °F)

VERSAPRO™ ANHYDROUS BASE

BACKED BY SCIENCE

VersaPro™ Anhydrous Base contains carefully-chosen ingredients which work synergistically to achieve a transdermal delivery system that does not compromise skin integrity all while providing a pleasant patient experience.

- ✓ Formulated with penetration enhancers to increase drug delivery through the skin ¹
- ✓ Contains solubilizers to promote dissolution of both lipophilic and hydrophilic actives
- ✓ Naturally-derived oils act as an emollient to maintain skin hydration and optimize transdermal absorption
- ✓ Film-forming ingredients improve retention time on the skin
- ✓ Water activity tested <0.6
- ✓ Passes HRIPT testing – hypoallergenic and dermatologist tested
